

Flexible Retail Enterprise Solutions

PDI/Envoy

Empower your back office with a purely retail enterprise solution fit for every retailer's needs.

PDI/Envoy is a convenience store back office software solution designed specifically with convenience retailers in mind and works with all leading domestic and international POS platforms. PDI/Envoy is designed to centrally control every aspect of retail operations from a home office while automating the daily books and store management operations.

End-to-End Reconciliation

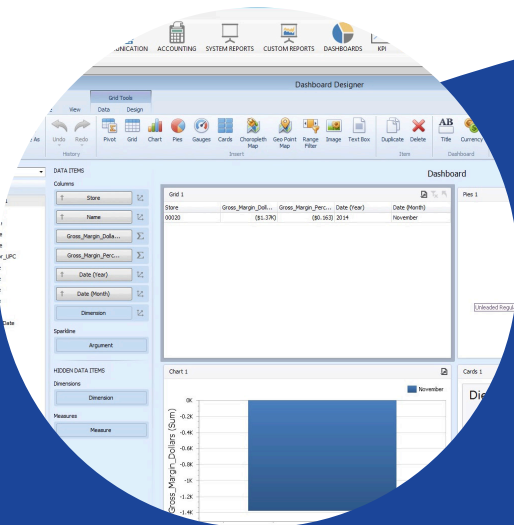

One Version of the Truth

Internationally Deployed

Fully Integrated

Why PDI/Envoy?

PDI/Envoy scales regardless of sites, locations, languages, and currency. The solution also integrates to industry leading third party POS, ERP, and financial reporting systems.

Your Business Problems Solved:

- International scalability: PDI Envoy scales to retail organizations large and small, multiple languages and currencies, and government regulation forms
- Inventory reconciliation: reconciles fuel and inventory all in one place guaranteeing you sell at a competitive rate
- Marketing promotions: you work hard to design marketing campaigns around your products, and we are here to make sure you have real-time data to track your success
